members directly can be  
obtained from the CAB  
web site or by contacting  
the board at  
(270) 554-3004.*

## Consensus Recommendation: 04-02

*Submitted for discussion by the Water Task Force, October 16, 2003*

### **Title: Six-Phase Heating Treatability Study Lessons Learned**

#### **Background:**

The Citizens Advisory Board has been actively seeking remediation of the groundwater contamination at the Paducah Site. Testing of different types of technologies at the site to attempt to eliminate the source of groundwater contamination is necessary. The Water Task Force has been following the progress of the Six-Phase Heating Treatability Pilot Project since the beginning of the system's operational period in February 2003. The Board expects to make a recommendation regarding which technology will be used to remediate groundwater contamination in the C-400 area.

#### **Recommendation:**

**The Board requests that DOE include in the Groundwater Operable Unit C-400 Remedial Actions Proposed Plan (D0) a listing of lessons learned from the Six-Phase Heating Treatability Study.**

*Approved by Consensus 10/16/03*
